

**DP WORLD**  
**Global Safety & Environment**  
**Children's Competition '07**

The aim of the Annual DP World Global Safety and Environment Children's Competition is to have children of employees from around the world enter drawings that relate to workplace safety and environmental protection. The feedback in previous years from various terminals has been overwhelmingly positive and the level of interest and excitement continues to grow.

This is the first time DP World Cochin is participating for this event. We had a good turn out for this event. Though we thought the topics were tough, children came out with brilliant ideas and innovative presentations. We were glad to see the ideas, thoughts and artistic talents exhibited by our children and the response was above our expectations.

This years topics for the drawing competition highlighted important messages about Safety and Environment. Topics for Safety included 'safety at work', 'safety at home', 'Pedestrian Safety', 'Mobile Equipment', 'Handling Loads', 'Working at Heights' and 'Vessel Safety'. For the Environment, topic was 'Why protection of the environment in local communities is important?'.  
 Such Competitions are held with an aim to recognize creative talent, increase awareness about safety and environment and to encourage DP World employees and their children right across the organisation to share their ideas, thoughts and artistic abilities with us.

Mr. Frank Carter (Terminal Manager) distributed gifts to all participants. Among the entries from all the DP World terminals number of prize winning entries will be selected and will be included in the 2008 DP World Global Safety and Environment Calender.

Such Competitions are held with an aim to recognize creative talent, increase awareness about safety and environment and to encourage DP World employees and their children right across the organisation to share their ideas, thoughts and artistic abilities with us.
